## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: externally fixed operation speed .

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what externally fixed operation speed means in claims.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hopkins in view of Wong et al, Juzswik et al as cited by applicant and JP 2001315620 as cited by applicant and Bicknell.

As best can be understood from the claims, Hopkins discloses automobile wiper comprising dc motor driven by dc power supply for sweeping wiper from park position to maximum wiping position and driving means for switch on and off by pwm duty corresponding to operation speed as switching element provided on a current rout between dc power supply and dc motor see fig 2 #34,#31,#33, and #35, see col 2 lines

Art Unit: 2837

5-20, col 3 lines 15-25. Hopkins lacks disclosing wiper and wiper driving assembled in a module, speed detection means of motor, mosfet for switching element, and relay connected parallel with switching element. Wong et al discloses wiper and wiper driving means assembled in a module, see fig 2 #48 and paragraph (0030) lines 12-17.

Juzswick et al cited by applicant discloses mosfet for switching element see fig 4, col 12 lines 25-35 and col 16 lines 55-60 and col 18 lines 30-40. Jp 2001315620 discloses detecting speed of motor see abstract. Bicknell discloses switch parallel with relay so motor rotates regardless of switching element, see col 3 lines 55-62. It would have been obvious to one of ordinary skill in the art to combine the wiper system of Hopkins with module of Wong et al for improved integration and speed detection of JP2001315620, Mosfet of Juzswick et al and relay of Bicknell for improved control.
